

ABSTRACT

The subject of the present application is a dyeing composition for dyeing keratinous fibres, in particular human keratinous fibres such as hair, comprising, in an appropriate dyeing medium, at least one cationic tertiary para-phenylenediamine containing a pyrrolidine ring, at least one non-cationic tertiary para-phenylenediamine and at least one benzomorpholine coupler. Advantageously, the compositions also comprise at least one colorant chosen from the para-aminophenols of formula V'', the heterocyclic couplers of formula (V''') and mixtures thereof. The subject of the invention is also the dyeing method using this composition.
